

## Garfield Jackson

I'm currently serving as a Supervisor of Transportation of Houston ISD, I've been in transportation for over 17 + years.

Hence, I have served in various roles such as: bus operator, recruiter, Terminal Manager/Manager of motor pool of operation assistance, and now Supervisor of transportation services.

Thus, my longevity in transportation has afforded me the opportunity to be a part TAPT along with obtaining certifications in over 15 + classes. Further, this has lead to my receiving a TAPT State Certification # 768 which I will continue to use thorough out my tenure in transportation.

Further, the greatest joy and privilege I have had is serving the community by way of staying current with information for our children. Yes, my staying abreast of how special needs should be cared for and follow thru with is a task I'm willing to work at. Also, the alternative school pose a challenge beyond understand but with loving concern and knowledge of need of students helps us along with drivers to bring about a recovery.

So, it's my aim to continue to be part of a system that imbues all within transportation to maintain our most precious cargo, elevate our next generation, become counselors in a world of confusion, and become along with maintaining the forerunners position as mentor.

In conclusion, it is hoped that serving as Vice President of Gulf Coast Charter will afford me the continual opportunity to serve the community, represent transportation, and promote GCAPT as the governing along with guiding force in the ever changing world call transportation.
